SUMMARY

Highly motivated and results-driven software engineer with a proven track record of designing and implementing robust, scalable applications. Seeking to contribute to an innovative team where I can apply my expertise in software development, continuous learning, and collaboration to drive impactful solutions in a dynamic and fast-evolving tech landscape

PROJECTS

Auction E-Commerce Website

- The E-Commerce Auction system is an online platform where users can bid on products listed for auction. It allows sellers to list items, and buyers can place bids in real-time, with the highest bid winning once the auction period ends. The project leverages C# and the .NET framework for backend logic, HTML/CSS and Bootstrap for the user interface, and JavaScript for interactivity and dynamic content updates.

Shoe Palace Android Application

- Shoe Palace is an e-commerce application designed to facilitate the buying and selling of footwear from various brands. Implemented in Kotlin for backend, Jetpack Compose for front end , Retrofit , secure payment integration and server integration using .NET .

Employment and Service Platform for Professionals and Skilled Workers Present

- Developed a cross-platform app connecting professionals with job opportunities and service requests. Developed using ASP.NET, microservices, with React Native for the frontend and Entity Framework for data management, enabling real-time matching and secure transactions.
